

WOPX Series

WHEN WIRES WON'T WORK™

Wireless Phone and Data Extension for 15 miles

When you need a phone or data line, but can not run wire, WOPX (Wireless Off Premise Exchange) by Teletics is your solution. WOPX is reliable, easy to install, and the most economical solution for your line extension needs. With WOPX you can place and receive, calls, faxes, emails, and even access the internet.

WOPX systems have been used throughout the world in some of the most environmentally demanding situations. Oil and gas drilling operations, fuel management systems, utility companies, and security facilities all rely on the Teletics name and WOPX performance. Why? Because traditional telephone and consumer communications products fail in these demanding environments.

WOPX - The Best Solution

- Drastically reduces communication set up time and manpower costs for moving work sites
- Eliminates exorbitant cabling costs associated with providing telephone and computer network services to customers where none previously existed
- Offers superior reliability of communications over temporary wiring approaches which are prone to failure
- Programming and system configuration changes are quick and easy due to the simple design of WOPX
- Perfect for point to point, direct line communications
- Available in 2.4 GHz and 5.8 GHz

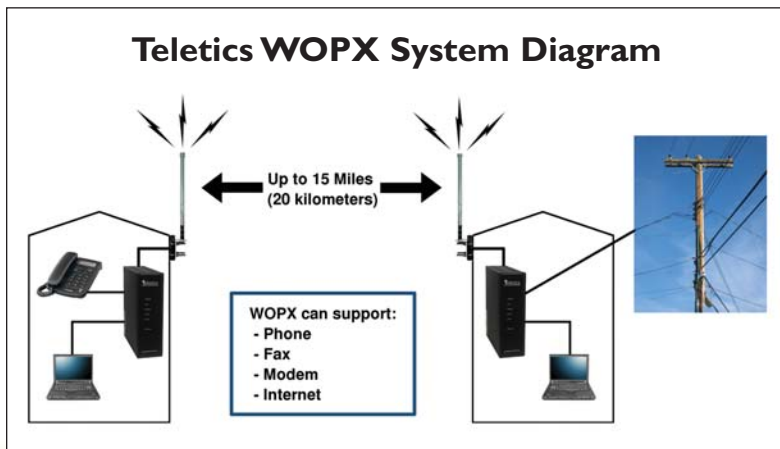

WOPX Series

WHEN WIRES WON'T WORK™

Whether you need a phone line for security system monitoring, electrical distribution metering, machine to machine communications, or voice and fax for the building across the street, WOPX is the most reliable, easy to install, economical solution for you.
